

I am writing to say that the FFC should not implement any proposal that would lessen Indiana's Telephone Privacy law protection. The law has improved my valuable time at home. Evenings and weekend's are not ruined by constant harrassment on the telephone. We used to recieve about 10 calls and messages a day. Now we recieve minimal calls. I would like to have some control over who is calling me. Without this law I have no voice as to who can bombard my home with endless calls. Please do not change it.
